

CATALOGUE 2020

Branded promotional textile

20 years of ADLER

20th
anniversary

We have been providing Europe with promotional textiles for 20 years already. Since 1999, when ADLER was founded, we have grown in all directions. We have entered the international market; we have developed new products and brands and we are constantly expanding our portfolio and investing in modern technology. While still being consistent with sustainable development.

Our goal remains the same: To offer our customers high-quality promotional and working textiles and to gradually become the largest distributor and manufacturer in Central Europe. We know that this journey requires a lot of effort as well as consideration and respect towards our partners and the environment. We are willing to make sure we keep developing and we are glad you are along for the ride!

1999

ADLER Czech was founded by Martin Hausenblas and Pavel Neumann, friends from high school.

2000

The first container of T-shirts arrives from China.

2003

We purchase our first property to be used for administration and storage.

2004

We enter the international market. First up are Slovakia and Poland.

2005

Part of the production moves from China to Bangladesh.

2006

We continue expanding: This time to Hungary, Germany and Austria.

2009

We expand to the south and north-east. The Baltic states surpass our expectations and become one of the fastest growing markets.

PRODUCT

Check the quality of our products by yourself. You can visit us in Ústí nad Labem and Ostrava, or in our showrooms.

DISTRIBUTION

Our intelligent logistics center in Ostrava ensures orders are delivered in time. With 25 mil. pcs capacity, we can satisfy even the over-limit orders.

PERSONAL CARE

Use the help of our professionally trained business team. They will gladly help you with the smooth progress of your order by phone, or in person.

20 years of

INSPIRATION

Markets

Showrooms

2011

Our previous warehouses are bursting at the seams and so we open a new logistics centre in Ostrava – Přivoz.

◀ 2012

We introduce the men's T-shirt BASIC, which soon becomes the flagship of our production portfolio. The same year, our new luxury brand for promotional textiles enters the market under the name MALFINT®.

2014

We start cooperating with the iconic Czech fashion designer Liběna Rochová and the same year our turnover reaches half a million Czech crowns. We extend our business in Croatia.

◀ 2015

Not even our warehouse in Ostrava – Přivoz is large enough and so we build a super modern logistics centre, Business Park ADLER Ostrava – Kunčičky, on a former brownfield.

2016

We open a branch in Beijing, introduce our new brand PICCOLIO to the market and, again, launch a new administrative building in Ústí nad Labem – Skorotice.

◀ 2017

We create a new brand of work clothing, RIMECK®, and become the exclusive distributor of Bata Industrials® protective footwear in selected countries. We expand into Italy and France.

2018

Our turnover surpasses one million Czech crowns and we open a branch in Dhaka, Bangladesh. We also finish building the second part of our logistics centre, Ostrava Business Park ADLER, where we install special technology as we would like the premises to become fully energy self-sufficient in time.

2019

We are proud to take first place in a prestigious financial competition and in a contest related to social corporate responsibility, where we present our new photovoltaic electrical power station at our warehouse in Ostrava.

◀ 2020

We are still right here beside you and we cannot wait to see what the next decades will bring.

Exclusivity

QUALITY

certification

Oeko-Tex Standard 100 is world-respected quality seal for textile products, made of only health-conscious materials.

WRAP is an independent nonprofit corporation, which ensures legal humanitarian and ethical production all around the world and awards companies by relevant certificate.

BSCI is Business Social Compliance Initiative, which purpose is to secure that the market enter only products, that have been produced with respect to the basic working and ethic rights.

GOTS is an acknowledged Global Organic Textile Standard International Working Group. Stipulates strict ecological and social rules for all phases of the production of organic textiles.

SUPIMA® /p. 161

The brand represents the finest cotton of 1% worldwide production. This type of the US grown Pima cotton has over a hundred years' history.

ORGANIC /p. 17

Cotton produced from ecologically controlled agriculture and further processed under the strict inspection of all manufacturing processes.

MERINO /p. 157

Merino wool is world renowned for its soft, yet firm feel, offering advantages in every area over common wool and many other fibers. As such, it is used in every area of fashion from haute couture robes to highly functional garments.

BRANDS

MALFINI® /p. 27

Products from the MALFINI® Collection excel in a variety of cuts, weights, materials and colours but they have one thing in common. You can rely on their quality and comfort. Whether for advertising purposes, sports or everyday wear, they will elegantly wear your print or embroidery.

MALFINI® Premium /p. 155

The exclusive brand MALFINI Premium® will dazzle you by its quality and precision. Fine materials, sophisticated details and inspiration from world trends together form a product, that will satisfy even the most demanding customers.

PICCOLIO /p. 145

With the Piccolio collection it is easy to please with something new. Wide product range at a favourable price, cheerful colours and simple processing allow you even the craziest prints that will grab your attention.

RIMECK® /p. 189

Where protection and efficiency come first, RIMECK® workwear comes in. The RANGER collections made of high-quality heavyweight materials enhanced with CORDURA® certified material ensure exceptional resistance.

Collection

LABEL FREE

LABEL FREE Create your own brand
QUICK AND EASY

You can easily create your own brand of clothing for the whole family.

All t-shirts are treated with silicone finish, therefore they are soft to the touch and have a silky shine.

They keep their colour, shape and shine even after being washed multiple times.

T-shirts are suitable for almost every kind of printing and embroidering.

**NO MORE

Global Organic Textile Standard (GOTS)

GOTS is recognized as the world's leading processing standard for textiles made from organic fibers. It defines high-level environmental criteria along the entire organic textiles supply chain and requires compliance with social criteria as well. The use of organic fibers from organic agriculture, the elimination of toxic substances and substances harmful to the environment and the introduction of a minimum wage, is only a small excerpt from the binding GOTS criteria. You can be sure that products marked with the GOTS logo are made with social and environmental responsibility.

MALFINI®

Products from the MALFINI® Collection excel in a variety of cuts, weights, materials and colours but they have one thing in common. You can rely on their quality and comfort. Whether for advertising purposes, sports or everyday wear, they will elegantly bear your print or embroidery.

T-SHIRTS

First T-shirts were designed at the dawn of the 20th century, and quickly became a part of military uniforms and common for blue-collar workers because of their practicality. Branding T-shirts with print came later from Disney with their iconic Mickey Mouse T-shirts. Over time, more studios, companies and even rock bands joined in on the trend and in just a century, a piece of practical clothing became a space for self-expression and even art.

POLO SHIRTS

Soon after the first plain T-shirts, ones with collars came in early 20th century. Designed to replace the impractical white shirts as the standard for sports clothing, various version of these collared T-shirts enjoyed great success in sports like golf, tennis or polo, which gave them the name – polo shirts. Eventually, these became common even outside sports, becoming a fixture in every wardrobe, and a pillar of the “smart casual” style.

SHIRTS

Shirt is one of the oldest articles of clothing still around. While originally part of the undergarments, by the end of the 18th century it was common at social events, and during the last century, shirts entered the ladies' wardrobe as well. Modern designs combine various materials, from poplin and plain weave to patterned twill, with different cuts, all in order to reach perfect comfort.

SWEATSHIRTS

In the 30's, sweatshirts were designed to deal with practical concerns of manual labourers working in colder weather. Originally simply thicker, long-sleeve T-shirts, they protected workers from the weather without limiting their movement or comfort. Sweatshirts enjoyed a boom starting in the 70's as a part and symbol of the hip-hop culture, a tool for the lower classes to express themselves.

FLEECE

Half-way through the 20th century, first concerns with the sustainability of the textile industry came up – and with them, the invention of fibers from recycled plastics, like polyester, polyamide and elastane. They were quickly developed for many applications, and fleece was among those. Popular for sports and outdoor activities as an isolating, heating layer, fleece also gained recognition for use in standalone comfort clothing.

FROSTY 527

in the RIMECK® section.

RIMECK®

OUTDOOR

Clothes meant for the outdoors need to have mechanical durability, wind and water resistance with good thermal isolation – while also being breathable. The breakthrough combining all of these is softshell material, introduced in the 70's. Thanks to its universal properties, it replaces layered clothing approach. Softshell is constructed to balance all requirements, and offers perfect protection against the weather.

ACTIVE

Coats, shirts and uniforms used as sports clothes of the past century had strict rules for how, and from what, they were made. As sport became an integral part of the modern lifestyle, as an escape from the everpresent stress – a way to relax both body and mind – sports clothes changed. Comfortable, airy and functional are the new rules, leading to rising use of cutting-edge, quick-drying and breathable, fabrics.

CAPS

A trend that is with us for over 150 years, first head covers with a visor were a part of baseball uniforms, protecting the players from the sun glare. These caps, with the team logo, first spread among the fans, then quickly into the wardrobes of millions. Today, caps come in many shapes and sizes – straight or arched visor – but they are still trendy as ever.

TERRY & BAGS

Accessories like these are daily necessities and are even serving as home décor. The towels as we know them today - with looped fabrics designed to absorb water while being also pleasant to the touch were preceded by light and straight fabrics.

Similarly, bags also used to be plain and utilitarian while now, they come with designs, patterns and colours, becoming a fashion accessory and one of the most popular promotional items.

MALFINI®

Premium

The exclusive brand MALFINI Premium® will dazzle you with its quality and precision. Fine materials, sophisticated details and inspiration from global trends come together to form a product, that will satisfy even the most demanding. The MALFINI Premium® collection emphasizes confidence and elegance, shows affiliation with a company or club and connects the heart of the wearer with your brand.

Characteristics

Breathable

Wool fibers can absorb a lot of moisture and lead it away from the body, and merino wool is even better at it.

Thermo regulating

Unlike synthetic materials, merino fiber is active and reacts to body temperature changes. It retains heat when the weather is cold, and cools down when it's hot.

Odor resistant

Merino wool has antibacterial effects and absorbs sweat. Clothes from it stay nice and fresh much longer, and in worse conditions.

Naturally elastic

Each fiber works like a small "spring", expanding and contracting back into shape. The fabric, as a result, doesn't wrinkle.

Pleasant to wear

The fine, flexible fibers of merino wool make it very comfortable overall. It is soft to the touch, pleasant to wear even directly on skin, unlike most other types of wool.

Everything about merino wool...

Merino wool is world renowned for its soft, yet firm feel, offering advantages in every area over common wool and many other fibers. The reason for these qualities is the size of an individual fiber – and merino wool fibers are very fine, thinner than 18 microns. As such, it is used in every area of fashion from haute couture robes to highly functional garments.

This natural wool is sheered from the Merino breed of sheep, kept in natural environment (open field), with most of the production comes from Australia, New Zealand and Argentina. Because sheep don't stop growing wool, they need to be sheered every year. Not only is wool a renewable resource, it is also biologically degradable – after you throw it out, it will decompose and provide soil with nutrients.

How to take care of it

You can use washing machine up to 40°C temperature, making maintenance easy. Of course, we recommend washing inside out and with similar colours.

To preserve the shape, avoid drying in direct sunlight and heat, and iron only using steam at medium temperature.

If your merino clothing catches a slight odor, just airing it properly should be enough to remove it.

MERINO RISE ♂ ♀ DUO NEW 1/4

190 g/m²

T-SHIRT GENTS ¹⁵⁷

Single Jersey, 100 % merino wool,

REDESIGNED CUT

new ready-made sizes

We introduce the new cut for Woody and Ranger line of workwear. The new slightly slimmer and longer design is anatomically shaped to allow for any motion.

Woody and Ranger work clothes are carefully designed and put together. The technical details, manufacturing process and use of the best materials don't change at all. The new cut still offers a number of multifunctional pockets, reinforced sections and reflexive elements.

NEW CUT

- *Narrower, more anatomic cut*
- *Longer to better fit the height of the wearer*
- *Longer seam allowance so the pants can be individually lengthened*
- *The same core design*

NEW 2/4 Novelty. In stock: Second quarter of the year 2020.
More information about stock availability will be provided by our sales department.

WOODY W51

Twill, 100 % cotton, 270 g/m²

ORIGINAL CUT: S (46/48) - 2XL (62/64)

NEW CUT: 44/46 - 60/62

- ▶ full-length molded zipper with flap
- ▶ folds on the back part
- ▶ 8 multifunctional pockets
- ▶ bellow pockets with flap and welt zip pockets
- ▶ rib knit sleeve cuffs with 3 % elastane
- ▶ the lower side hem with elastic band
- ▶ metal D-ring and carabiner for keys and ID cards
- ▶ double stitching for extra durability
- ▶ retroreflective elements

RANGER W53

Linen texture, 65 % polyester, 35 % cotton, 270 g/m²; CORDURA® 100 % polyamide, 210 g/m²

ORIGINAL CUT: S (46/48) - 2XL (62/64)

NEW CUT: 44/46 - 60/62

- ▶ full-length molded zipper with chin protection and flap
- ▶ 7 multifunctional pockets
- ▶ bellow pockets with flap and welt zip pockets
- ▶ sleeve pocket
- ▶ rib knit sleeve cuffs with 3 % elastane
- ▶ lower hem adjustable by snap buttons on the sides
- ▶ metal D-ring and carabiner for keys and ID cards
- ▶ double stitching for extra durability
- ▶ retroreflective elements
- ▶ highly resistant fabric CORDURA® in 01 colour

WOODY W01

Twill, 100 % cotton, 270 g/m²

ORIGINAL CUT: S (46/48) - 2XL (62/64)

NEW CUT: 44/46 - 60/62

- ▶ waistband with elastic sides
- ▶ 7 multifunctional pockets
- ▶ reinforced material in the knees and rear part
- ▶ plastic D-ring and carabiner for keys and ID cards
- ▶ hammer loop
- ▶ double stitching for extra durability
- ▶ retroreflective elements

RANGER W03

Linen texture, 65 % polyester, 35 % cotton, 270 g/m²; CORDURA® 100 % polyamide, 210 g/m²

ORIGINAL CUT: S (46/48) - 2XL (62/64)

NEW CUT: 44/46 - 60/62

- ▶ waistband with elastic sides
- ▶ 10 multifunctional pockets
- ▶ reinforced material in the knee part
- ▶ plastic D-ring and carabiner for keys and ID cards
- ▶ hammer loop
- ▶ double stitching for extra durability
- ▶ retroreflective elements
- ▶ highly resistant fabric CORDURA® in 01 colour

WOODY W02

Twill, 100 % cotton, 270 g/m²

ORIGINAL CUT: S (46/48) - 2XL (62/64)

 NEW CUT: 44/46 - 60/62

- ▶ waistband with elastic back part
- ▶ button side closure
- ▶ adjustable braces with buckle and elastic insert
- ▶ 8 multifunctional pockets
- ▶ reinforced material in the knees and rear part
- ▶ plastic D-ring and carabiner for keys and ID cards
- ▶ hammer loop
- ▶ double stitching for extra durability
- ▶ retroreflective elements

elastic band in the back part

multifunctional pockets

RANGER W04

Linen texture, 65 % polyester, 35 % cotton, 270 g/m²; CORDURA® 100 % polyamide, 210 g/m²

ORIGINAL CUT: S (46/48) - 2XL (62/64)

 NEW CUT: 44/46 - 60/62

- ▶ waistband with elastic back part
- ▶ button side closure
- ▶ adjustable braces with buckle and elastic insert
- ▶ 14 multifunctional pockets
- ▶ reinforced material in the knee part
- ▶ plastic D-ring and carabiner for keys and ID cards
- ▶ hammer loop
- ▶ double stitching for extra durability
- ▶ retroreflective elements
- ▶ highly resistant fabric CORDURA® in 01 colour

elastic band in the back part

multifunctional pockets

WOODY W52

Twill, 100 % cotton, 270 g/m²

ORIGINAL CUT: S (46/48) - 2XL (62/64)

NEW CUT: 44/46 - 60/62

- ▶ full-length molded zipper with flap
- ▶ folds on the back part
- ▶ 8 multifunctional pockets
- ▶ bellow pockets with flap and welt zip pockets
- ▶ the lower side hem with elastic band
- ▶ metal D-ring and carabiner for keys and ID cards
- ▶ double stitching for extra durability
- ▶ retroreflective elements

RANGER W54

Linen texture, 65 % polyester, 35 % cotton, 270 g/m²; CORDURA® 100 % polyamide, 210 g/m²

ORIGINAL CUT: S (46/48) - 2XL (62/64)

NEW CUT: 44/46 - 60/62

- ▶ full-length molded zipper with chin protection and flap
- ▶ 6 multifunctional pockets
- ▶ bellow pockets with flap and welt zip pockets
- ▶ lower hem adjustable by snap buttons on the sides
- ▶ metal D-ring and carabiner for keys and ID cards
- ▶ double stitching for extra durability
- ▶ retroreflective elements
- ▶ highly resistant fabric CORDURA® in O1 colour

WOODY W05

Twill, 100 % cotton, 270 g/m²

ORIGINAL CUT: S (46/48) - 2XL (62/64)

NEW CUT: 44/46 - 60/62

- ▶ waistband with elastic sides
- ▶ 7 multifunctional pockets
- ▶ reinforced material in the rear part
- ▶ plastic D-ring and carabiner for keys and ID cards
- ▶ hammer loop
- ▶ double stitching for extra durability
- ▶ retroreflective elements

RANGER W06

Linen texture, 65 % polyester, 35 % cotton, 270 g/m²; CORDURA® 100 % polyamide, 210 g/m²

ORIGINAL CUT: S (46/48) - 2XL (62/64)

NEW CUT: 44/46 - 60/62

- ▶ waistband with elastic sides
- ▶ 10 multifunctional pockets
- ▶ plastic D-ring and carabiner for keys and ID cards
- ▶ hammer loop
- ▶ double stitching for extra durability
- ▶ retroreflective elements
- ▶ highly resistant fabric CORDURA® in O1 colour

segmented retroreflective bands

HV DRY 1V8

Grid knit, 100 % polyester, 150 g/m²
S - 3XL

- ▶ high visibility clothing
- ▶ quick-drying fluorescent fabric
- ▶ segmented retroreflective bands
- ▶ cut with side seams
- ▶ 1.1 rib knit neckline hem
- ▶ fixing shoulder seams
- ▶ certification according to the standards EN ISO 20 471 (class 2) and EN ISO 13 688

EN ISO 20 471
 EN ISO 13 688

HV PROTECT 1V9

Interlock pique, 55 % cotton, 45 % polyester, retroreflective bands 3M, 175 g/m²
S - 3XL

- ▶ high visibility clothing
- ▶ fluorescent polyester on the outer side
- ▶ cotton on the inner side
- ▶ certified retroreflective bands 3M
- ▶ cut with side seams
- ▶ 1.1 rib knit neckline hem
- ▶ fixing shoulder seams
- ▶ certification according to the standards EN ISO 20 471 (class 2) and EN ISO 13 688

EN ISO 20 471
 EN ISO 13 688

HV RUNWAY 2V9

Interlock pique, 55 % cotton, 45 % polyester, retroreflective bands 3M, 175 g/m²
S - 3XL

- ▶ high visibility clothing
- ▶ fluorescent polyester on the outer side
- ▶ cotton on the inner side
- ▶ certified retroreflective bands 3M
- ▶ cut with side seams
- ▶ 1.1 rib knit collar with a contrast stripe
- ▶ placket with 3 buttons in the shell fabric colour
- ▶ inner neckline with a shell fabric tape
- ▶ fixing shoulder seams
- ▶ certification according to the standards EN ISO 20 471 (class 2) and EN ISO 13 688

EN ISO 20 471
 EN ISO 13 688

NEW Novelty. In stock: Second quarter of the year 2020.
More information about stock availability will be provided by our sales department.

HV ESSENTIAL 4V6

French terry, brushed inner side, 100 % polyester, retroreflective bands 3M 300 g/m²
M - 3XL

- ▶ high visibility clothing
- ▶ smooth fluorescent fabric
- ▶ brushed inner side
- ▶ certified retroreflective bands 3M
- ▶ straight cut with side seams
- ▶ 1.1 rib knit bottom hem, cuffs and neckline
- ▶ certification according to the standards EN ISO 20 471 (class 3) and EN ISO 13 688

 **EN ISO 20 471**
EN ISO 13 688

HV FLEECE JACKET 5V1

Fleece, 100 % polyester, antipilling finish retroreflective bands 3M, 280 g/m²
M - 3XL

- ▶ high visibility clothing
- ▶ insulating fluorescent fabric
- ▶ certified retroreflective bands 3M
- ▶ full-length molded zipper in O1 colour
- ▶ welt pockets with molded zipper
- ▶ bottom hem adjustable by elastic drawstring
- ▶ sleeve hems with elastic band
- ▶ antipilling finish on the outer side
- ▶ certification according to the standards EN ISO 20 471 (class 3) and EN ISO 13 688

 **EN ISO 20 471**
EN ISO 13 688

HV GUARD 4 IN 1 5V2

Upper jacket: Oxford, 100 % polyester with PU finish, retroreflective bands 3M, 180 g/m²
 Inner fleece: Polar fleece, 100 % polyester, retroreflective bands 3M, antipilling finish on both sides, 280 g/m²
 M - 4XL

- ▶ high visibility clothing
- ▶ multipurpose use 4 in 1 in two-colour design

Upper jacket:

- ▶ waterproof, breathable, fluorescent fabric
 - ▶ certified retroreflective bands 3M
 - ▶ full-length molded zipper with flap
 - ▶ removable hood with reinforced peak, hidden in the collar
 - ▶ hood and bottom hem adjustable by elastic drawstring
 - ▶ removable sleeves
 - ▶ sleeve hems with elastic band, adjustable with velcro
 - ▶ bellow pockets with flap and side pockets
 - ▶ breast zip pocket with placket
 - ▶ pocket for ID card and pens
 - ▶ taped seams
 - ▶ access for branding in back lining
- certification according to the standards EN ISO 20 471 (class 2, 3), EN 343+A1 (class 3:1) a EN ISO 13 688

Innerfleece:

- ▶ removable inner fleece jacket
- ▶ insulating fluorescent fabric
- ▶ certified retroreflective stripes 3M
- ▶ full-length molded zipper
- ▶ pockets with molded zipper
- ▶ trimmed by elastic stripe
- ▶ antipilling finish on both sides
- ▶ certification according to the standards EN ISO 20 471 (class 3) and EN ISO 13 688

4 in 1

3

2

1

NEW Novelty. In stock: Third quarter of the year 2020.
 More information about stock availability will be provided by our sales department.

HV BRIGHT 9V3

Warp knit, fluorescent 100 % polyester, retro-reflective bands
120 g/m²
M (FH 160 - 176 cm), 2XL (FH 184 - 192 cm)

- ▶ high visibility clothing
- ▶ velcro fastening
- ▶ trimming in O1 colour
- ▶ retroreflective bands
- ▶ certification according to the standards EN ISO 20 471 (class 2) and EN ISO 13 688

HV BRIGHT 9V4

Warp knit, fluorescent 100 % polyester, retro-reflective bands
120 g/m²
4-6 years/104-128 cm, 6-8 years/116-140 cm

- ▶ high visibility clothing
- ▶ velcro fastening
- ▶ trimming in O1 colour
- ▶ retroreflective bands
- ▶ certification according to the standard EN 1150

HV ENERGY 9V2

Oxford, 100 % polyester, retroreflective band
70 - 80 g/m²
uni

- ▶ fluorescent fabric
- ▶ closure by drawstring
- ▶ 2 polyester drawstrings in gray colour
- ▶ retroreflective band
- ▶ reflective elements in lower corners
- ▶ interior zip pocket 20 x 23 cm
- ▶ gymsack dimension 45 x 34 cm

HV TWISTER 3V8

Single Jersey, 100 % polyester, retroreflective bands, 190 g/m², uni

- ▶ tubular cut with seam
- ▶ quick-drying fluorescent fabric
- ▶ retroreflective bands
- ▶ sewn edges
- ▶ multipurpose use (variants displayed on the packaging)
- ▶ 50 x 26 cm

HV PRACTIC 5V9

Fleece, 100 % polyester, antipilling finish
240 g/m²
uni, circumference 55 cm

- ▶ 2 in 1 - hat and neckwarmer
- ▶ insulating fluorescent fabric
- ▶ adjustable by a drawstring in O1 colour on one side
- ▶ antipilling finish on the outer side

HV REFLEX 3V5

Twill, 50 % cotton, 50 % polyester, 240 g/m²
adjustable

- ▶ six-panel design
- ▶ quick-drying fluorescent fabric
- ▶ retroreflective band on the peak and closure
- ▶ bonded 2 front panels
- ▶ stitched, slightly curved peak
- ▶ embroidered air holes
- ▶ sweatband
- ▶ size adjustable by velcro

size adjustable by velcro

Additional ASSORTMENT

GIFT BOX WITH COVER CT1

three-layer cardboard 1,01 E
manufactured from recycled paper
310 × 250 × 25 mm (min. 1 pcs)
360 × 280 × 80 mm (min. 120 pcs)

GIFT BOX WITH COVER CT4

three-layer cardboard 1,01 E
manufactured from recycled paper
310 × 250 × 25 mm (min. 1 pcs)
360 × 280 × 80 mm (min. 120 pcs)

CARTON CT6

3-ply cardboard
F0 = 305 × 215 × 120 mm (min. 80 pcs)

5-ply cardboard
F1 = 395 × 295 × 135 mm (min. 80 pcs)
F2 = 385 × 285 × 210 mm (min. 40 pcs)
F3 = 385 × 285 × 290 mm (min. 40 pcs)
F4 = 585 × 385 × 280 mm (min. 30 pcs)
F5 = 585 × 385 × 330 mm (min. 30 pcs)
F6 = 585 × 385 × 380 mm (min. 30 pcs)
F7 = 585 × 385 × 430 mm (min. 30 pcs)
F8 = 585 × 385 × 480 mm (min. 30 pcs)
F9 = 585 × 385 × 530 mm (min. 20 pcs)

BAG WITH SELLO TAPE PE BGE

polyethylene (PE), thickness 0.04 mm
300 × 400 mm, 400 × 500 mm
(min. 100 pcs)

BAG WITH SELLO TAPE PP BAG

polypropylen (PP), thickness 0.03 mm
300 × 400 mm, 400 × 500 mm
(min. 100 pcs)

ADHESIVE TAPE CT7

biaxially oriented polypropylene film (BOPP)
width 75 mm,
winding 60 mm
(min. 1)

SHIRT ANCILLARY FOLDER P11

71 × 59 c,
size of folded shirt
cca 22 × 35-50 cm

Marketing SUPPORT

What does ADLER POINT offers you?

- Linking of our e-shop with yours
- more than 6000 product pictures in the highest quality
- visualization of the product with your graphics
- online catalogue for your customers
- the creation of your own newsletters and price offers

find more at www.adlerpoint.info

Sample Pack

Custom mix of MALFINI® and MALFINI Premium® products with 25 % DISCOUNT

How to order Sample Pack:

- Minimum amount of selected products is 10 pcs (max. 1 pc of colour and size)
- Orders are possible only with help of our Sales Department (e-mail: dev@adler.info)

You can order your own Sample Pack up to 4 times per year under the conditions above. Sample Pack cannot include products on sale and the Piccolo and Rimeck® collection and the Bata Industrials® footwear.

PRINT

& embroidery

DIGITAL PRINTING

An ideal technology for orders of a low quantity. A direct print is made on a state-of-the-art KORNIT® printer by using special water-based pigmented inks. The printing is of a photo quality and resolution and is guaranteed to be wash-resistant up to 40 °C. The textile can be ironed from the reverse side.

SUBLIMATION PRINTING

Is suitable for textiles made of min. 65 % synthetic fibre. Disperse dye is printed on a sublimation paper underlay from which it is transferred to the textile in the form of vapour by using heat and pressure. The printing does not need fixation. The stability of colours is very good, imitations (significantly more expensive) of colourful woven goods are barely distinguishable from originals. In addition, the original material properties such as breathability and washability are preserved. This printing method is ideal for both transferring photographs and other images and is suitable for piece as well as serial production.

SILK-SCREEN PRINTING – DIRECT PRINTING

The oldest and so far the most effective textile printing technology. We use a machine which enables us to reach high daily production (up to 15 000 prints) while maintaining the same print quality from the first to the last print of the order. Thanks to this technology we are able to print practically any motif - from the simple and monochromatic to the photo-realistic one. The printing is guaranteed to be wash-resistant up to 40 °C. The printing can be ironed from the reverse side.

TRANSFER PRINTING

A printing method where a motif is first printed on a special transfer foil, then fixed with glue and subsequently transferred to the textile by using heat and pressure. This printing method is applicable to all kinds of products and is mainly used where a direct print is not suitable. It cannot be applied to water repellent materials. The printing can be ironed from the reverse side.

LASER ENGRAVING

The modern technology allows engraving on the textile by using a laser beam. It is unique and so far uncommon branding of fleece products. The final motif is burnt into the fabric (it's plastic) and so lasting forever. Since there is no paint or yarn application, the resulting graphic is unicolour - of the colour of the textile.

EMBROIDERY/EMBROIDERED PATCHES

This is a very high-quality way of presenting motives, logos or slogans on textile products. To be able to sew a certain motif onto a product we have to create an embroidery pattern for which we need to get a high-quality digitized model(.tif, .cdr, .pdf, .ai, .epg). Then your motif is transferred into the sewing machine's program and is embroidered either directly on the product or in the form of a patch sewn or glued on it.

PRESSING

Suitable for 100% cotton products without buttons and zips that could be damaged by the pressure. This technology enables pressing of products into a shape chosen by you so you get an unusual gift or promotional item. You can select from our library of shapes or send us your own design.

GLITTERING STONES

This special technology can be used for any motif's size or colour combination. The transparent or opaque stones are available at the size from 1,5 up to 8 mm. The minimum order for textiles with this application is 200 pieces. Products decorated this way have to be washed inside out at 40 °C.

Overview of

MATERIALS

NATURAL MATERIALS

COTTON

The most popular natural material in the fashion industry. Cotton is characterized by properties such as softness, pliability, strength, absorbency and breathability. It is pleasant to the touch and resists higher temperatures. It is often used in combination with synthetic materials or elastane.

ORGANIC COTTON

Cotton produced from ecologically controlled agriculture and further processed under the strict inspection of all manufacturing processes. The biggest producers are Turkey, India, the USA and China.

For more about GOTS certification see page 17.

NEW MERINO WOOL

Active fiber that regulates body temperature changes and is one of the most breathable natural fibers. The fiber can absorb large amounts of moisture – along with odour molecules in the sweat. Natural elasticity maintains dimensional stability, and the fabric is easy to maintain. For more information see page 157.

VISCOSE

Fiber made based on regenerated cellulose. The input raw material for the production is wood or cotton pulp. Viscose is breathable and it has great absorption features. Compared to cotton, it is softer, shinier and finer.

BAMBOO FIBER

Fiber made of bamboo based on regenerated cellulose. It has thermoregulatory, antibacterial, antimycotic and antistatic properties. Bamboo fiber is stronger along with three times higher absorbency than cotton, resistant to frequent washing and keeps its properties for a long time. We do not recommend using fabric softener in order not to reduce absorbency of the material.

SYNTHETIC MATERIALS

ELASTANE

Very fine, strong, elastic polyurethane fiber. The key feature is its high elasticity. Elastane can be stretched out from three up to seven times of its original length without breaking. It is always used in combination with other materials, ensures dimensional stability, increases elasticity and reduces material wrinkling. Elastane is prone to high temperatures.

POLYESTER

Synthetic fiber made by modification of the input material. The fiber is very strong so it can be made thick or very fine (micro polyester). Material is durable, quick-drying and easy-care. It is suitable for sports and physical activities. Through chemical and mechanical processes various modifications of the material properties can be achieved depending on the purpose of use (insulation, impregnation).

POLYAMIDE

The process of polyamide production is similar to the one of polyester. The material is durable, easy-care and has a good shape stability. It dries quickly thanks to low moisture absorption. It has twice the greater abrasion resistance than polyester. The fiber can be made thick or very fine as well as polyester. Mechanical and chemical treatment influences the final product's properties.

POLYPROPYLEN

Smooth and hard surface fibres have high abrasion resistance. They show good hydrophobic properties which, due to very low water sorption, preserve the strength and dimensional stability of the material even in damp environments. The final material is lightweight and shows good thermal insulation.

BRANDED MATERIALS

SUPIMA®

The brand represents the finest cotton of 1% worldwide production. This type of the US grown Pima cotton has over a hundred years' history. Its unique extra-long fibers are twice the strength of regular cotton. They are resistant to pulling, breaking and tearing which makes products made of it incredibly smooth, resistant, non-pilling and keeping their appearance for a long time.

Nanotex® Resists Spills

Certified fabric which has been fundamentally transformed through nanotechnology. The result fabric repels liquids, extends the lifetime, retains natural softness and breathability. When a liquid comes into contact with the fabric, rather than sinking into the fibers, the fluid beads roll right off the surface without leaving a mark.

SOFTSHELL

Softshell is a laminated textile for modern and sports plain weaving and plain weaving for outdoor activities. It is divided into membrane and non-membrane. Plain weaving made from this material is light, warm, elastic and has high mechanical resistance. Softshell with a membrane can be waterproof and simultaneously air permeable.

CORDURA® CLASSIC

The CORDURA® fabric is made in accordance with approved standards of the company INVISTA. CORDURA® holds off stains, resists tears and abrasions like no other fibers. Its strength ensures high longevity. CORDURA® is a registered trademark of INVISTA for durable fabrics.

3M™ STRIPES

3M retroreflective stripes increase visibility of the person who wears the garment, thereby reduce possibility of accidents. 3M™ technology of reflective materials is based on a layer of microscopic glass spheres mounted on the substrate fabric layer with a mirror surface. On 1 cm² of the fabric there are up to 30,000 glass beads.

NEW SEGMENTED STRIPES

Retroreflective stripes are used to improve visibility during night and bad optical conditions. They are designed for use on safety clothes, with flexibility in mind, preserving full range of motion. These stripes are thermally applied, and can handle washing very well.

Overview of FABRICS

FINISHES

SINGLE JERSEY SLUB

Fine weft knitted fabric with characteristic structure of slub fabric. To achieve this final effect, a yarn with thicker and thinner sections is used throughout the length which are created by varying the tightness of the twist. This fabric is also characterized by its elasticity.

SINGLE JERSEY

Fine weft knitted fabric with characteristic dendritic columns on the outside and arches on the reverse side. The weave features ductility, softness and easy unstitching. The quality of the final product depends on the thread used for making the fabric. Products are manufactured from high quality ring spun thread.

PIQUE

Weft knitted fabric patterned with geometrical relief on outside. On the reverse side it is enhanced with supplementary thread. This type of knitting is popular for production of polo shirts and plain weaving ideal for sports and leisure activities. The products made from it are breathable and easy to maintain.

INTERLOCK PIQUE

Warp knitted fabric with a pattern in which two fully interlocking rows alternate with a one-face row. One side of the knitted fabric has twilled separate stitches while the other side is plain. This type of knitting is popular for production of polo shirts and plain weaving ideal for sports and leisure activities. The products made from it are breathable and easy to maintain.

DOUBLE FACE

Double face knitting also called double-sided. The wave is densely alternating front and back uprights on the outside and reverse material sides. In the unstretched position only front stitches are visible, reverse stitches are visible only while stretched. This knitted fabric looks identically from the back and it is highly elastic in the transverse direction.

NEW GRID KNIT

Quick-drying, breathable knit for the production of modern, functional clothing. The special grid structure perfectly moves moisture away from the body and expands it onto the fabric surface for fast drying, making it feel fresh, dry but also cooling the body. High elasticity ensures maximum comfort during wear.

RIB KNIT

Double-sided knitted fabric consisting of rib pattern indicated by 1:1 or 2:2. This information determines the ratio of regularly alternating vertical stripes of stockinette stitch with vertical stripes of reverse stockinette stitch. Rib knit fabric is elastic and it is mostly used for collars, cuffs, plackets and hem of poloshirts and sweatshirts.

FRENCH TERRY – not brushed

Weft knitted fabric with characteristic dendritic columns on the outside and arches on the reverse side. The weave is enhanced with supplementary thread that leads along the reverse side of the fabric. The supplementary thread increases strength, absorption as well as the volume of the fabric.

FRENCH TERRY – brushed

Weft knitted fabric with characteristic dendritic columns on the outside and brushed soft on the reverse side. Reverse side of the material enhanced with supplementary thread is fluffed by mechanical process. Such way treated surface has a larger volume and shows warmer properties.

STRETCH FLEECE

Smooth outside, brushed inside functional stretch knit fabric with great thermo isolating properties. It is soft, lightweight, breathable and quick-drying material. It is suitable for sports and physical activities. Inner part of the material has antipilling finish.

FLEECE

Weft knitted fabric characteristic with brushed dense teased soft surface on both sides of the material. It has outstanding insulating attributes, long lifetime and easy-care. Material can be treated with antipilling finish. Products are suitable for embroidery and laser engraving.

PLAIN WEAVE

Plain weave fabric is made of strong, regularly repeating weave that has the same appearance on the outside and reverse side. With its simple and dense interlacing, it creates a steady and smooth surface suitable for printing and embroidery. Plain weave fabrics are manufactured from high quality combed cotton or polyester.

POPLIN

Mostly used type of material for shirts production. It is extremely soft, pleasant to the touch, though stiff enough. It is made by a plain weave wave which has a higher amount of warp than weft threads.

OXFORD

Wave derived from canvas wave. The difference is that there are at least doubled yarns alternating when fabricating the fabric. Oxford is shinier than canvas. It has a wide range of use. It can be made from natural or synthetic yarns.

RIP STOP

Very strong regularly repeating wave. In this smooth fabric are interwoven thick warp and weft threads in the intervals of 5 - 8 mm. The surface gets an effect of a grided structure. This imaginary grid significantly increases the fabric rip and tear resistancy.

TWILL

Wave characteristic by diagonal spacing that is regularly repeated. It consists of alternating the system of warp and weft yarns. The fabric is very robust, tear-resistant and easy-care. The most common use of twill wave is in denim or workwear. The material is also popular for caps production. It can be smooth or brushed. The brush finishing makes the surface softer with matt appearance.

TERRY

Loop fabric consists of solid loops on both sides of the material. It is a three-dimensional fabric with very soft touch and excellent absorbent properties. It is ideal for towels and bath towels production in the material composition of 100% cotton or blend of bamboo fiber and cotton.

NONWOVEN FABRIC

Fabric produced without knitting or weaving. Input material is a polypropylene polymer melt. The result is a smooth, flat, porous fabric with a relatively high tensile strength and low abrasion and bending strength. The material is popular in the industry due to low acquisition costs and good filtration and insulation properties.

PRESHRUNK COTTON

During the production process of cotton products the space between the fiber gets reduced which eliminates the risk of shrinkage of the fabric during the washing and drying cycle. This process allows the final product to be washed at high temperatures for the purpose of removing any impurities and bacteria.

MERCERIZED COTTON

The process of mercerization consists of immersing the cotton yarn into a bath for the purpose of changing their sections and leveling uneven fibers. The fiber cross-section thus obtains an almost perfect shape. The final material becomes smoother shinier and softer. Mercerization results in higher strength and better color stability of the material.

SILICONE FINISH

The silicone finish is similar to the effect of fabric softener, however longer lasting. It makes the product soft to the touch, more dirt-proof and the prints stick much better.

ANTIPELLING FINISH

Antipilling finish minimizes the release of fibers and prevents fabric's pilling. This process results in fibres fixation and stabilization. It reduces damaging of the upper part under excessive use and friction and extends the product lifetime and functionality.

PU FINISH

A long-lasting polyurethane layer that is applied from one side of the base fabric. It provides water, moisture resistance, abrasion and dirt resistance. Due to the special composition, the layer is very flexible, lightweight and does not negatively affect the other properties of the product.

PA FINISH

Acrylic treatment is used to improve the mechanical and practical properties of the fabric. It is mainly used in outdoor clothing and is characterized by wind resistance and tensile strength.

TPU LAMINATION

Durable top layer made of thermoplastic polyurethane ensures stability of material properties in a wider range of conditions. The combination of the TPU membrane and the top material maintains the flexibility of the product and provides waterproof and abrasion resistant surface with excellent bend and tensile strength.

SILVER COATING

A special matt silver coating applied from the inside of the fabric improves the functional properties of the material. It increases water resistance, prevents transparency of the top material and increases resistance to damage potentially caused by washing.

FAMILY CONCEPT
Product available in gents, ladies and kids style.

DUO CONCEPT
Product available in gents and ladies style.

SILICONE FINISH
The silicone finish is similar to the effect of fabric softener, however more lasting. It makes the product soft to the touch, more dirt-proof and the prints hold much better.

ANTIPELLING FINISH
The antipilling finish lowers the pilling tendency of the fabric.

WINDPROOF
Windproof material prevents wind and chills from penetration.

WATERPROOF
Rating in millimetres to indicate material's resistance to water pressure. The higher the water column is, the longer the fabric will remain waterproof.

BREATHABLE
Rating in g/m² per 24 hours. The ability of a fabric to allow moisture vapor in grams in square meter per day. The higher the value is, the better fabric breathes.

EXTRA DRY
Extra dry material.

ELASTANE
A synthetic fiber that contains polyurethane bonds of high elasticity.

COOL/WARM
Soft, easy care, quick-drying and conductive fabric.

3 in 1
Multi use jacket can be worn as one whole winter jacket, or separately as a windbreaker and a fleece

4 in 1
Multi use Hi-Vis workwear jacket can be worn as one whole, upper and inner part separately, or just the upper jacket without sleeves as a vest

TEAR OFF
Tear off label.

STICKER LABEL
Label in a form of a sticker. Can be easily taken off.

LABEL FREE
The products have only a small size label behind the neck for easy rebranding

FLAT SEAMS
Double-sided cover stitch which is flat ensures maximum wearing comfort.

TAPED SEAMS
Technology supporting the waterproofness of material at seams. The waterproof tape is applied thermally under pressure over the inside seams.

R Selected garments from the collection HIGH-VISIBILITY (HV) RIMECK® correspond to the international standards, which determine the optimal form of protective Plaining with high visibility. Certified garments from the HV collection are supplied with a leaflet providing information on proper storage, treatment and purpose.

EN ISO 20471:2013 – High visibility Plaining – this international standard specifies requirements for Plaining with high visibility, which is able to visually indicate the presence of a user for vehicles or other mechanized means of transport under any light conditions, both in daylight and when illuminated by headlights of vehicles at night.

High visibility Plaining are made of fluorescent material, and in combination with reflective stripes are divided into three categories:

Category 3 – the highest level of protection – the minimum required substrate surface is 0.80 m² and 0.20 m² of retroreflective material

Category 2 – the medium level of protection – the minimum required substrate surface is 0.50 m² and 0.13 m² of retroreflective material

Category 1 – the minimum level of protection – the minimum required substrate surface 0.14 m² and 0.10 m² of retroreflective material.

EN 1150:1999 – Protective Plaining – caution Plaining with high visibility for non-professional use – standard specifies requirements for optical properties of caution high visibility Plaining suitable for adults or teenagers, not for professionals. The garments are designed for visual indication of the presence of users in all light conditions, both in daylight in urban lighting and when illuminated by headlights of vehicles at night.

EN 343:2003+A1:2007 – Protective clothes – Rain protection – European standard determining the properties of fabrics and seams of a protective garment. The characteristics of these are measured for the outside of the clothes. After achieving the specific permeability requirements and reaching the appropriate certification, it provides protection against water penetration and resistance against steam penetration for the wearer.

EN ISO 13688:2013 – Protective Plaining – this international standard specifies the general requirements for the implementation of protective workwear in terms of ergonomics, safety, size designation, aging, marking of protective Plaining and the information which is supplied by the protective Plaining manufacturer.

SIZE CHARTS

The data in the tables represents figure measurements not plain weaving.
